

2010 CSI Grand Rapids Chapter - CDT Certificate Study Sessions

The Grand Rapids Chapter of the Construction Specification Institute (CSI) is now accepting registrations for the 2010 Construction Document Technologist (CDT) Certificate Exam Study Sessions. Taught by industry professionals, these Study Sessions are beneficial for those who wish to further their professional development within the construction industry. The CDT Study Sessions cover the construction process, contractual relationships, and the relationships and organization of construction documents. The exam has been substantially modified for the Spring exam to better reflect the current state of the industry. These sessions are designed to assist examination candidates in the review of source materials, such as CSI's Project Resource Manual (PRM), AIA or EJCDC General Conditions - 2007, CSI Format documents, Sustainability and Green Building, AIA's Integrated Project Delivery (IPD) and Building Information Modeling (BIM).

Candidates must personally register for the CDT exam, in addition to the CCS, CCCA, and CCPR exams. These exams are given through *Prometrics* testing facilities during the week of Monday, March 29 thru Saturday, April 3, 2010.

Scheduled CDT Study Sessions occur on Monday evenings for eight consecutive weeks from January 25 until March 15 from 6:00 to 8:00 pm at the offices of Rockford Construction, located at 5540 Glenwood Hills Parkway, Grand Rapids, MI. There is a \$75 registration fee, \$30 for students. Mentoring for those interested in studying for the three certification exams; Certified Construction Specifier (CCS), Certified Construction Contract Administrator (CCCA), and Certified Construction Product Representative (CCPR) may also be arranged.

Visit the CSI Institute Website at www.csinet.org to Register for the exam and the CSI Grand Rapids Chapter website at www.csigrandrapids.org under "Certification" tab for CDT Study Guides and other Study Session related information. CDT exam registration pricing and deadlines are as follows:
